

Project Planning Pack

A fillable and printable workspace for knitting, crochet, weaving, spinning, cross stitch, and other fiber projects.

WHAT IS INSIDE

- Project brief and fit planning
- Swatch and gauge record
- Yarn, dye lot, and materials inventory
- Budget and milestone trackers
- Pattern modifications and troubleshooting log
- Finishing checklist and project reflection

Use digitally or print as often as you need for your own projects.

One pack, one project - duplicate the file or print a fresh copy for each project.

1**Define the finish line**

Write the project, recipient, target size, deadline, and what success looks like before buying materials.

2**Make and treat a swatch**

Use the same yarn, stitch pattern, tool, washing, blocking, and finishing method planned for the final piece.

3**Record evidence**

Keep the yarn label, dye lot, gauge, measurements, changes, and actual costs together so the project can be repeated.

4**Recheck before irreversible steps**

Confirm fit and counts before cutting yarn, seaming, steeking, trimming fabric, or beginning final finishing.

PLANNING NOTE

Calculator results are planning estimates. Yarn construction, fiber, stitch pattern, tension, blocking, and finishing can change the final result. Your treated swatch is the strongest project-specific evidence.

Project brief

Define the project and the result you want before materials or momentum lock in the plan.
